A complete hot menu around the clock

iWave's innovative vending package allows hot food to be provided 24 hours a day 365 days a year. Customers simply take their selection from the vending machine, scan the barcode on the packaging and place the item to begin the cooking process. iWave technology makes the process totally foolproof and eliminates any need for staff supervision.

- A fully automated foodservice solution for fresh, frozen and ambient foods.
- Ability to operate 24/7, 365 days a year.
- 100% error proof producing consistent and safe results every time.
- Barcode encryption ensures that only food purchased on the premises can be cooked on the premises!
- Menus can be created to meet any dietary or nutritional requirements.
- Very economical to run with an environmentally friendly carbon footprint providing a saving of up to 70% over conventional foodservice methods.
- The system can be built up and programmed as required then added to at any time to cater for all foodservice demands.
