

Conveyor Toasters

This very popular range consists of 3 models to suit all possible requirements. Our conveyor toasters are extremely easy to use, keep clean and with their attractive design and operation from a single 13amp supply, they are ideal for front of house use.

These products not only produce toast, but can handle various breaded products too and the various throughputs offered across the range means there is an option to cater for the smallest establishment up to the largest needs of hotel buffets and motorway service stations. Efficient, reliable and built to withstand the rigours of daily continual service, as well as being excellent value for money.

All products are backed up by quality Italian manufacture and a full 1 Year Warranty.

MEMT18012

This unique model is not only the smallest in the range, but also the smallest available in the UK! Perfect for operators needing an affordable, entry level product whilst not sacrificing workspace. All models in the range are made in Italy to the highest standards!

Loading: 0.8 kW
