Partnering Vending Innovation- iWave® Feedstation

The new **iWave® Feedstation** from exclusive supplier, RH Hall, is effectively a food kiosk to self-vend or self-serve a tasty hot food offering 24 hours a day, 365 days a year.

A great new innovative product, the Feedstation can combine either a freezer or refrigerator, with a microwave or the ultimate accelerated regeneration system, the iWave® to produce fool-proof, quality results time after time.

Custom made in the RH Hall UK fabrications factory, the Feedstation can be tailored to carry any branded corporate look and style. Available as a standard merchandise design or with full digital marketing/multimedia screens designed around a client's desires to market, promote or interact with the customer. The added use of touch screen technology provides a whole host of options for displaying information, advertising or meal options.

A standard size model encompassing a fridge/freezer and a microwave or iWave®, together with slots/shelves and napkin/food bag storage is available from stock from as little as £1099, or rental and leasing options are available from only £3/day.

RH Hall also has a range of ready to go food/meal solutions from their food supply partners to complete the package.

For more information or to discuss your individual requirements, please contact the RH Hall Bespoke Foodservice Solutions Division on 01296 663400 or visit www.rhhall.com.
